

Hutchinson Road Construction

Hutchinson Road is one way, southbound only, from Clayton Road to Marsh Avenue. The city received a federal grant and is making an investment of a half million dollars in repairs to the road from Clayton Road to Manchester Road. The work will consist of replacing deteriorated curbs and sidewalks, upgrading accessibility and installing a new driving surface. The process will be completed in phases over the next two months first from Clayton Road to Marsh Avenue, then from Springer Avenue (Wren Trail) to Froesel Drive with the final section from Marsh Avenue to Manchester Road. Residents on Hutchinson Road and immediately adjacent to the street were notified by letter. A message board is located at Clayton Rd. and another at Manchester Road both on Hutchinson Road notifying drivers of the impending work and closures. Construction should be complete by September 1, 2016.

We realize this presents a major inconvenience for those who depend upon the road daily. It is important that we maintain Hutchinson Road for the safe use by both drivers and pedestrians. After 20 years, the road and supporting infrastructure is in need of maintenance and upgrades. Once complete, hopefully it will be another 20 years before extensive repairs are needed again.
