

UPDATE

ADDITIONAL LEAF COLLECTION

Each year the city provides two fall collection cycles for each of the city's three districts. While the program begins at the same time each year, trees losing their leaves are on their own calendar. This year leaves are falling later than usual. The city will remain on the set schedule running through late December. Once the regular timetable for collection is complete, an additional (third) collection will be made throughout the entire city. There will be no predetermined route or time schedule for this additional collection. Weather conditions and the holidays will lengthen the collecting period.

If you want to be assured your leaves are removed before a specific date or holiday you have additional options. We suggest either biodegradable yard waste bags for weekly trash hauler pick up through the end of December; which requires your purchase of a yard waste tag at \$2.90 for each bag. Alternatively, you may take your leaves to the city's mulch yard at 553 Old State Road at no cost. All leaves dropped off should be loose; no bags please.

Feel free to give us a call with any questions at (636) 227-9660.

Thank you for your patience as we continue this year's leaf collection.
